No. 3

SEASON
1939-1940

GREETINGS:

We take pleasure in presenting to you a careful compilation of what we have to offer for this season in trees, shrubs and plants; if carefully read, we hope will suggest and create a desire for more beauty to your home grounds.

We are of the opinion that a home is not complete until it is "Planted" and naturally will take great pleasure in offering you our assistance in every way possible to bring about this acquisition to your home grounds.

From the many letters of praise for our stock, from our patrons this past season we feel satisfied that we can merit your future patronage.

WE GUARANTEE: Our stock to be grown true to name and properly packed: We cannot control condition after plants leave us, making it impossible for us to guarantee plants to live.

Our responsibility for delivery ceases when we have delivered the stock in good condition to the transportation company or carrier. Any claims should be made within five days of receipt of stock. It must be agreed that our liability under this guarantee is limited to the original price received for stock.

TERMS: All orders must be accompanied by cash; Add 2% Sales Tax to all orders for delivery within the State of Alabama.

TRANSPORTATION: State whether order is to be shipped by parcel post, express or freight.

Prices subject to change without notice.

Visitors always welcome.

M. M. WINDBIGLER, President

H. L. WINDBIGLER, Vice-President

A. C. MAHLER, Secretary.

Cultural Information

for growing better Camellias and Azaleas.

The first main item is the stock that you buy to plant. If you buy shade house grown stock that is not used to full sun and has been grown in a crowded condition, you cannot expect to have them grow off and make you nice plants and give you the flowers that you expect. When you buy always ask for and get plants that are growing in full sun in the fields. They are more sturdy and will transplant and grow as you want them to.

Next you must have the place where you are to plant the new plants ready and in proper condition. If in a sandy soil take out the sand down to two feet and refill with fresh pond muck, add well rotted dairy fertilizer, peat moss; this makes a mixture that will feed your plants and will retain the moisture during the hot dry weather in summer. If you use cotton seed meal be sure and use the hose and wet as it will burn the plants, and is sure to if used in sandy soils and no water used. Vigoro may be used in the spring, but plants must be well watered whenever commercial fertilizer is used. Never use a fertilizer that contains lime as it sweetens the soil, and these plants thrive in acid soil. If you have alkaline soil, then use Aluminum Sulphate at the rate of four-inch pot full to a wheel barrow of soil.

If you cannot water the plants the first season that they are planted then they should be shaded until late fall. Mulch them well with peat moss; that helps hold the moisture and keeps down the weeds.

Azaleas and Camellias will grow and give you all the flowers that you expect growing in full sun. Keep them away from other large plants that are gross feeders and will steal the food and moisture that you give your new plants.

Do not be afraid to prune the plants, but do so in early summer for when you do it in the fall time you cut away many of your flowers.

Insects And Diseases

Red Spiders attack both Azaleas and Camellias. It is apparent by dropping of many leaves from the Azaleas; the Camellia leaves become brown in color. On Azaleas you can use the hose and wash them off. If this does not control them, use the following dust measure: Mixture, eight pounds sulphur, one pound arsenate of lead, one pound tobacco dust. Dust on early in the morning while the dew is on. Be sure and dust the under side of the leaves.

Camellias are attacked by several species of scale insects. You can tell when your Camellia has scale by the leaves becoming spotted and yellow, caused by scale on the under side of the leaves. They should be sprayed by Nursery Volk, Jr., one part to 50 parts of water. If the infestation is heavy they ought to be sprayed three times a year during the early spring and summer. Be sure and spray the under side of the leaves as that is where you will find the scale. Warning: DO NOT SPRAY Camellias in late fall or winter as a sudden cold weather

just after spraying may kill your plants, or cause buds to drop.

Remember, buy good plants, place in well prepared beds, spray when needed, mulch with peat moss, and you will have shrubs of which to be proud.

Azaleas can be transplanted any time of the year. However, the best time is from the first of September through March. Camellias can be transplanted from the latter part of September until growth starts in spring.

Any special problem that you may have in regard to your plants, send us a card and we will be glad to help you.

Camellia Japonica

This is King of our broad-leaved evergreens. During the summer, you have a beautiful glossy evergreen. When fall comes they commence to bloom for you, and will continue to give you beautiful flowers until late winter. We are offering this season 50 varieties, and will have many more to offer this coming year. Will be very glad to help you make your selection so you will have flowers all winter. On some varieties, supply, limited so advise placing your order early. We have an extra fine stock of, Blood of China, (Called Victor Emmanuel) and others of the rare varieties, and will be very glad to show our stock to you, on many varieties we have larger sizes than listed and same will be priced according to the merits of the individual plants, will be very glad to quote prices on same. Be sure you follow our directions on care and culture of camellias.

Class

Red Camellias

Extra GLEN NO. 40. Flowers large, red shading into salmon, heavy bloomer, frost does not injure the buds. Slow grower. Late season bloomer. A very rare variety and one you will place at the head of your list, come and see it in bloom here at the nursery.

2½ in. to 40 in.

- A **DOWNING.** Flowers large, semi-double red, yellow stamens, free flowing, cold does not injury the buds. Good grower. One you will like. Place this beside Camellia Dora McCarter, which is a pure white and makes a beautiful blending of color.
2½ in. pot to 48 in.
- B **SARAH FROST:** Flower double, rose-red, compact fast grower, very hardy.
2½ in. pot to 96 in.
- Extra **MATHOTIANA RUBRA: (Purple Emperor)**
Rare Flower large of rose form, light-red to red and as the flowers get older, outer edge of petals turn purple. Good grower. Mid season bloomer.
2½ in. pot to 30 in.
- Extra **BLOOD OF CHINA (Called Victor Emmanuel):** Flowers very large, deep red peony form, and when the flowers first open remind you of a large red rose. We have a very fine stock of this variety and are priced according to size and form.
Rare 2½ in. pot to 48 in.
- Rare **PURPLE EDGE:** Has been called here in County, Purple Dawn, for the last 38 years. But this is not the same camellia called under that name here in the last few years. Flowers medium size, light-red and petals on out side of flower turns to purple shade as flowers get older. Good grower. Mid season bloomer.
2¼ in. pot to 40 in.
- B **GLOIRE DE NANTES (Lena Superba):** Flowers large, semi-double cerise red. Center petals often twisting. Good grower, beautiful dark green foliage. Mid season bloomer.
2½ in. pot to 48 in.
- A **PROF. SARGENT:** One of the darkest red camellias, flowers very thick peony form, good upright grower. Mid season bloomer.
2½ in. pot to 60 in.
- A-1 **CARNATION (Christmas Glory)** Carnation form, bright red, slow grower, mid season bloomer.
2½ in. pot
- B **JARVIS RED:** Large semi-double deep blood red, good grower, clean cut foliage. Mid season bloomer.
2½ in. pot to 36 in.
- A **CHEERFUL:** Flowers, red, double, showing stamens, tall symmetrical grower.
2½ in pot to 36 in.
- A **ROSE EMRY:** Crimson peony form, medium size, early bloomer.
2½ in. pot to 24 in.
- A-1 **TUTCHERIA:** Dark red, medium size flower, fair grower, mid season bloomer.
2½ in. pot

Class

Pink Camellias

- A PINK PERFECTION** (Fru Minnie Seidel. Baby Pink): Shell pink, full double, early bloomer, fast grower. You will always get flowers from this old standard variety. We have a large stock for you to select from, in fact the largest on the Gulf Coast.
2½ in. pot to 60 in.
- A SEMI-DOUBLE BLUSH**: Semi-double beautiful shade of blush-pink. Good grower, flowers hold their color better if you will plant this variety where it gets part shade.
2½ in. pot to 36 in.
- B DIXIE** (Fielders-Pink. Pink-Cheerful. Rosita) Double rose-pink, profuse bloomer, compact strong grower. Mid season.
2½ in. pot to 48 in.
- Rare LADY HUME BLUSH**: Medium flower, full double, with delicate flesh pink, one of the very rare camellias. Slow grower, mid season.
2½ in. pot to 18 in.
- Rare DAIKAGUARA**: Deep pink, double irregular form, large flowers, early bloomer.
2½ in. to 18 in.
- Rare POWELL'S PINK**: We list this under this name as we have not been able to find the correct name. Large fluffy pink, good grower, small leaves, mid season.
2½ in. pot.
- Rare MADAME ADELE**: Large pink radiance rose color, loose peony form, with yellow stamens. Good grower. Mid season and always has flowers, rare and one we know that you will like.
2½ in. pot to 48 in.
- B RAINY SUN**: Large deep pink semi-double flowers, showing stamens, beautiful foliage. Good grower. Mid season.
2½ in. pot to 24 in.
- Rare APPLE BLOSSOM**: Single, small pink flowers, quite fragrant, fast grower, mid season.
2½ in. pot to 30 in.
- A ENRICO BETTONI**: Flowers very large, beautiful, clear light pink, form varies from semi-double to peony form, on same bush, fast grower. Clean cut foliage.
2½ in. pot to 60 in.
- Rare DEBUTANTE** (Sarah C. Hastie): Delicate shade of solid pink, large peony form. Good grower. Mid season.
- Rare KUMASAKA** (Lady Marion): Flowers large size peony form of deep pink, late season bloomer.
2½ in. pot.
- Rare LADY CLARE**: Immense size, single pink flower, one of the largest camellias.
2½ in. pot to 24 in.
- Rare MARCHIONESS OF EXETER**: Large size pink flowers of peony form, good grower. Early bloomer.
2½ in. pot

Class **Variegated Camellias**

Rare **PURPLE DOT:** Pure white, dotted with purple, good grower, blooms large and heavy.

2½ in. size pot size

A **BONAMIANA:** Flowers white with red variationism stamens interspersed. You will also find on the same plant solid colors of red and white flowers, compact good grower.

2½ in. pot to 40 in.

B **MRS. ABBY WILDER:** A double white flower, with occasional stripes and splotches of pink. Good grower.

2½ in. pot to 24 in.

Rare **MADAME NIHART (Fanny Bollis):** Large single to semi-double deep red flowers marbled with white, large leaves good grower.

2½ in. pot to 36 in.

A **CHANDLERII ELEGANS (Pride of the Emperor Garden):** Flowers very large, peony form, cherry red with white. One that always pleases and should be in every planting we have a very fine stock of this old favorite.

2½ in. pot to 60 in.

A **HERME (Hikari Gengi. Jordans Pride. Jenny Lind. Sou de Henri Gouchard):** Large loose semi-double to peony form, variegated white with red and pink stripes. Some times you will find solid colors on the same plant.

2½ in. pot to 48 in.

A **MME DE STREKALOFF (Gen Lamericiere):** Beautiful large double, soft rose with small stripes of crimson, flowers varies on same bush.

2½ in. pot to 36 in.

Rare **SWEET I VERA (Duc-d-Orleans, Lowelling Vari.):** Exquisite large semi-double white with markings of delicate pink.

2½ in. pot

A-1 **HORKAN (Rena Campbell, Variabilias):** Peony form, pink and white combination also has solid colors. Very good grower.

A-1 **MONARCH (Honor of America. Gunelli. Red Ball. Imbricata.):** Large double, deep pink to light red, occasional white spots. Slow spreading grower.

2½ in. pot to 24 in.

A **MEIGS VARIEGATED:** Large, light rose-pink, sometimes splashed white, full double, good grower, early season profused bloomer.

2½ in. pot to 24 in.

Climbing, Mary Wallace, pink.

Climbing, Talisman, golden yellow.

Climbing, Black Boy, dark reddish black.

Prices on all Roses:

Each \$.30 Twelve for \$3.00 prepaid

HINTS ON ROSE CULTURE

Roses do best in a stiff soil, not too light. Add clay where you have too sandy soil. A good mixture of peat moss, well rotted cow manure, and bone meal is beneficial. Roses are heavy feeders and should be well fertilized and watered.

There are two diseases and one pest that give most of the trouble here in the South. (1) Mildew: May be controlled by dusting with Dusting Sulphur. (2) Black Spot: A fungus growth which causes black spots on the leaves and causes them to turn yellow and fall off. Spray with Bordeaux Mixture every 10 days or two weeks. (3) Thrips: An insect which feeds on the blooms and leaves. Can be controlled by using nicotine sulphate at the rate of 1 to 600 to your Bordeaux spray.

ROSE ROULETTE—Very dwarf form of rose, never grows over ten inches high, small double pink flower. Novelty for pot or rock garden.

Each \$.30 Six for \$1.50
